

The Roman Catholic Diocese of
BATON ROUGE

CONSTRUCTION PLANS REQUIREMENT FOR METAL AND MASONRY BUILDINGS:

- Structural design details with metal building details.
- Building framing details
- Overall building sections and wall sections. This includes waterproofing/flashing details where / if the new construction meets the existing structure.
- Door and window details
- Detailed furnishings, finishes, and equipment plan.
- A roof plan with downspout locations and details of how it connects to sub surface drainage.
- A mechanical plan with details stamped by a mechanical engineer.
- An electrical plan with details stamped by an electrical engineer.
- A specification booklet.
- Overall budget with detailed cost estimate.
-

These basics are typically required by the fire marshal and city for buildings:

- Civil plans and drainage
- Site plans
- Dimensioned floor plans and a life safety plan
- Building sections
- Wall sections with waterproofing and building envelope details.
- Structural, mechanical, and electrical, plumbing plans
- Sizes of ductwork, plumbing sewer piping, type fixture, water line sizes, grills
- Energy code analysis required by the fire marshal's office.
- Specification booklet
